Segovia, Spain|Eligible to, sign an internship agreement via IE University

Summary

Dual-degree student in Business Administration and Computer Science & AI at IE University, with hands-on experience building and shipping production-grade mobile applications. Experience in software engineering, game development, and AI, with practical exposure spanning React Native mobile development, Unity C# programming, and machine learning fundamentals.

Education

IE University (IEU), Spain

Expected: July 2029

- Relevant Coursework: Cloud Computing, Computer Programming I, Physics for CS, Calculus for CS.

Experience

Women's Health Startup- Remote, Madrid, Spain

February 2026 - June 2026

Full Stack Developer

- Developed a cross-platform iOS/Android app from scratch using React Native, Expo SDK 55, and TypeScript, leveraging Claude Code and Cursor as agentic development tools to accelerate feature delivery across a multi-screen production codebase.
- Designed and integrated RESTful data flows between a Firebase/Firestore backend and React Native frontend, managing async state, null-guarding, and real-time updates across a multi-screen application.
- Managed CI/CD and mobile distribution pipelines via EAS Build, TestFlight, and Google Play internal track
- Constructed a Node.js data pipeline to parse, transform, and categorise raw Excel recipe data into a structured, phase-indexed JSON schema consumed at runtime by the app

IE PROJECTS- Madrid, Spain

October 2025 - December 2025

Frontend Developer & Designer

- Designed a new look in **Figma** for an existing website, respecting design guidelines, worked closely with the supervisor going through over 5 versions, final version was published on official website and is currently in use.
- Incorporated new designs into website operating **WordPress**, Custom features leveraging **HTML**, **CSS**, **JavaScript** and **React**.

Extracurricular Activities

- FreeCodeCamp - Python Certification (Coursework):** developed core Python fluency (syntax, control flow, functions), applied OOP fundamentals (classes/objects, encapsulation/inheritance concepts) through hands-on exercises/projects (Jan 2026-Present).
- NeetCode** (NeetCode 150): Practicing key DS&A patterns across Arrays & Hashing, Two Pointers, Sliding Window, Stack, Binary Search, Linked Lists, Trees/Tries/Heaps, Backtracking, Graphs, Greedy, Intervals, DP (1D/2D), Bit Manipulation(Jan 2026-Present).
- Cursor × IE Hackathon** — Developed Pitch Perfect in a 3-person team in one day: an AI presentation coach with real-time audio/movement analysis in-browser and GPT-4o post-session scoring across body language, pace, and delivery. Stack: React, TypeScript, Firebase, Vercel. (March 2026)
- Tech Venture Bootcamp** — constructed a tech startup MVP in a team setting, conducting market research and rapidly prototyping a market-ready product using Cursor, ChatGPT, and Lovable as core AI development tools, alongside Figma, React Native, and CSS. (October 2025)
- Personal AI Dev Automation** — Built a custom agentic workflow connecting Cursor to Slack via n8n, enabling mobile-triggered coding sessions from anywhere; extended the system with scheduled tasks that autonomously audit the NutriSync codebase for errors and vulnerabilities on a recurring basis. (May 2026)

Languages

- Italian(Native). English (Fluent, C1). Spanish(Intermediate, B2).

Additional Information

- Programming Languages:** Python, R, C, C#, JavaScript, TypeScript, HTML/CSS.
- Libraries & Frameworks:** .NET, React, React Native, Expo.
- DevOps & Cloud:** Git, Azure DevOPS, Docker, Jira, Cloud Computing, EAS Build.
- AI and Agentic Tools:** Claude Code, Cursor, n8n, Lovable, Replit.
